

## PHYSICS 125.05 and 125.08, Fall 2008

section 05 Thursday 11:20-12:15 room 123 Chem

section 08 Thursday 2:20-3:15 room 123 Chem

Section Instructor: Prof. Miriam Forman is (temporarily?) replaced  
by Prof. Philip Allen

Email: [philip.allen@stonybrook.edu](mailto:philip.allen@stonybrook.edu)

Section web page: <http://felix.physics.sunysb.edu/~allen/125/>

**Office hours:** I am usually in the main physics & astronomy office room P-110 Physics, Monday through Friday approximately 10-12. Ask the undergraduate secretary Elaine Larsen for help finding me. My other office is B-146 Physics, located on the bridge between the B-level of Physics and the Math tower (connecting to both floors 3 and 4). My telephone numbers are 2-8758 for P-110 and 2-8179 for B-146.

Recitation meets every week, even if there is no lab that week. The “quizzes” will usually be “cooperative learning” exercises. You work in groups of three, and hand in only one solution under all three names. The most important rule is that you **MUST** discuss the problem with each other. You may also ask me questions. You may use your text book and your notes. It is important to come on time. If you come late, you will probably have to work alone. The aim of these exercises is to help you learn the skills you will need to do well on the exams. Your answers should be formatted as if you were doing an exam. That means you must show your work. No credit will be given for a correct numerical answer if no explanation is given.

I will try to post solutions to the problems on the “section web page” given above, by Thursday evening.
